

A vision for moving healthcare forward.
Our experts provide healthcare solutions through medicines management and optimisation.

Visante improves efficiency and patient outcomes by working closely with hospitals, providers and clinical commissioning groups to identify areas for improvement in all aspects of medicines service.

We work alongside our clients to achieve lasting results that match the needs of the organisation.

Real impact

Our experience

Visante brings a proven track record in three countries of optimizing the use of medicines. We listen to each client's needs, study current operations, and work alongside at all levels within the organisation to create practical and efficient approaches that will achieve lasting results.

Our people

Visante consultants are your experts. Our physicians, pharmacists, nurses and IT professionals provide a vision for solutions based upon best practices from multiple countries. Each of our consultants brings more than twenty years of successful medicines management in healthcare organisations so they are prepared for the most challenging situations.

Our services

Our multidisciplinary approach to medicines management will help your organisation to optimise patient care and manage costs. Visante consultants continually meet with hospitals and healthcare companies suggesting new ideas and cutting edge technologies that are quickly being recognised as best practices. Some of our key services include:

- High cost medicines management
- Long term conditions
- Medicines safety
- Medicines use process
- Antimicrobial stewardship

“Visante has a proven track record of supporting clients to create systems that are practical, cost-efficient and that stand the test of time.”

— Robert Lea, pharmacist with senior level NHS experience in strategic planning and administration of healthcare

Visante offers value for money by providing our clients bespoke solutions that work.

Since Visante launched in the US in 1999, we have worked with many satisfied clients who keep coming back to us to create solutions for new projects. Our services continue to expand as healthcare evolves.

Examples of Visante UK solutions:

➤ **Antimicrobial stewardship**

Visante provides clients with a fresh perspective for delivering health services. Our philosophy is to listen to each client's needs, study current operations, and work alongside at all levels within the organisation to create practical and efficient approaches that will achieve lasting results.

➤ **Medicines optimisation for long term conditions**

Visante consultants have developed methods for monitoring adherence and achieving medicines reconciliation when patients transfer between different care settings. We have expertise in identifying options for ambulatory and home care services that help patients with long term conditions (e.g., chronic heart failure) to keep well and avoid unnecessary admissions and re admissions to hospital.

➤ **Patient Safety Assessment**

Our multidisciplinary team has extensive experience working with risk reduction strategies and patient safety enhancements. We successfully assist organisations with the review and analysis of current systems and the creation of enhanced patient centered care models that ensure safe and effective use of medicines in all practice settings.

➤ **IV Therapy Assessment**

Visante consultants have considerable experience in the development and expansion of IV additive and infusion services in hospitals as well as ambulatory home care settings.

Visante works with a number of NHS partners and private sector healthcare providers to identify efficiency savings. Visante's aim is to help deliver quality, innovation, productivity and performance around medicines use.
